(54) RECEIVING DEVICE, TRANSMITTING DEVICE, TRANSMISSION AND RECEPTION SYSTEM, RECEIVING SYSTEM AND RECORDING MEDIUM

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain various communication forms by switching a reproduction mode of expression information showing an incoming of information based on attribute information added to an article and according to the transmission state of an article.

SOLUTION: An expression means decision part 4 decides an expression means based on the analysis result of a display attribute analysis part 3 and sends this decision result and the reproduction information to an expression means switching part 2. The part 2 starts an expression means reproduction part 5 according to the decision result of the part 4 and transfers the reproduction information to the part 5. An expression means storage part 6 serving as a reproduction procedure storage means stores the procedures defining the numbers and reproduction parameters of the material data used for reproduction of the expression means as variables for every expression means and every item of the expression attribute. The part 5 started by the part 2 refers to the part 6 and the reproduction information to carry out the expression means reproduction procedure stored in the part 6 based on the reproduction parameter pointed by the reproduction information and reproduces the expression means in a mode accordant with the transmission state.

LEGAL STATUS

[Date of request for examination] 21.04.2000
[Date of sending the examiner's decision of rejection]
[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]
[Date of final disposal for application]
[Patent number] 3371199
[Date of registration] 22.11.2002
[Number of appeal against examiner's decision of rejection]
[Date of requesting appeal against examiner's decision of rejection]
[Date of extinction of right]
